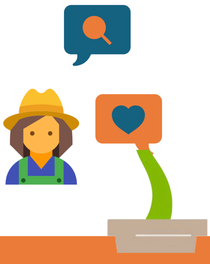
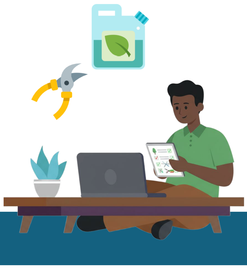
Landscape Maintenance Calendar for Boston Properties

A well-maintained landscape enhances curb appeal and property value. This calendar outlines the essential seasonal tasks for Boston property owners to ensure a healthy, vibrant outdoor space throughout the year, from spring awakening to winter dormancy.

Early Spring (March–April): Assessment & Preparation

- Seasonal clean-up of leaves and debris
- Inspection for winter burn on evergreens
- Soil testing for pH and nutrient needs
- Early structural pruning of shrubs
- Pre-emergent weed control applications
- Irrigation system start-up and inspection





Late Spring (May–June): Growth & Definition

- Balanced fertilization for turf and beds
- Refresh mulch to a depth of 2–3 inches
- Bed edging and definition
- Monitoring irrigation coverage
- Staking perennials and correcting plant lean

Summer (July–August): Stress Management

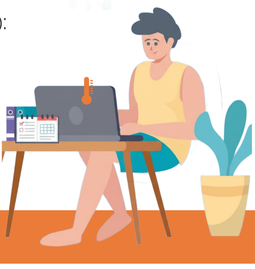
- Irrigation audits and calibration
- Adjusting mowing height for turf protection
- Deadheading flowering plants
- Monitoring for mildew and fungal issues
- Selective pruning for better air circulation

Early Fall (Sept–Oct): Key Window

- Core aeration to relieve soil compaction
- Overseeding cool-season turf
- Fall fertilization for root development
- Planting trees and shrubs
- Dividing and transplanting perennials

Late Fall (November): Winter Prep

- Final leaf removal to prevent smothering
- Irrigation blow-out and winterization
- Anti-desiccant treatments for evergreens
- Wrapping young trees if necessary
- Inspecting drainage before ground freeze



Winter (Dec–Feb): Oversight & Planning

- Removing heavy snow from shrubs
- Checking for ice damage after storms
- Dormant pruning of select tree species
- Reviewing maintenance strategy for the coming season

Professional Maintenance
